ashortwalk launch new Coastal Weather Station.

A Cornish company best known for their successful range of wall mounted tide clocks have launched a new Coastal Weather Station aimed at providing the unique weather information required when living and enjoying our great coastline.

"The majority of the world and UK population live close to the coast yet there are very few products helping us get the most out of our coastline. The ashortwalk Coastal Weather Station is unique in providing the information we need to enjoy this ever-changing and inspiring landscape – it's up to the user to then get out there and make the most of it!" Says ashortwalk founder and ex- Dyson designer Dan Dicker.

This world's first encompasses a barometer to determine changing weather patterns; a tide clock to predict when best to go and enjoy yourself and a conventional clock for timing your escape. The Coastal Weather Station is an essential tool for coastal living.

The Coastal Weather Station retails at £44.95 and is available from some 250 stockists country wide. The ashortwalk website www.ashortwalk.com has details as well as the full product range.
